

FORESTAL MIMOSA LIMITED

SUPPLIERS OF AFRICAN MIMOSA EXTRACTS

MIMTAN AT2 POWDER

A very light coloured Mimosa extract treated to produce a highly soluble powder with low astringency and improved lightfastness.

Mimtan AT2 has very good penetration, distribution and filling properties, and produces a leather with a smooth fine grain. It is also ideally suited for leathers requiring embossing where it facilitates print retention.

Its improved lightfastness renders it eminently suitable for the retannage, in combination with Tara, of wet blue automotive leathers.

Typical Analysis

	SLTC Shake Method
Tannins	66.8
Non-Tannins	26.7
Insolubles	0.3
Moisture	6.2
	<hr/>
	100.0
	<hr/>

Standard Lovibond Tintometer Colour Test

(1 cm cell 0.5% tannin solution)

Red	0.5
Yellow	1.0
pH at 50° Bkr (6.7° Bé)	4.5
